Geotechnical Analysis																												
Uniaxial Compression	D7012 - C											ü																
Triaxial Compression	D7012 - A											ü																
Axial Young's Modulus	D7012 - C											ü																
Water Content	D2216											ü																
Bulk Density									ü			ü																
Atterberg Limits	D4318											ü																
Indirect Tensile	D3967											ü																
Slake Durability	D4644											ü																
Swelling Strain	ISRM											ü																
Axial & Diametral Point Load	D5731											ü																
Shear Strength	D5607											ü																
Notes																												
ISO 17025 accredited parameters		ISO			ISO	ISO					ISO		ISO													ISO		
Short Prox & Prox do not include BTU					ISO*
